

WEAPONS MANAGEMENT AND SECURITY

with the ARMS Armory
Management System

- Weapons
- Gear
- Accessories

Weapons accountability, chain-of-custody, bar code and RFID tracking and much more in one easy-to-use package

- Creates **weapons receiving form** keyed to unique serial numbers
- Produces **work order form** to track incoming weapons, inspections and repairs
- Prints **weapons tag receipt, repair history and identification tag**
- Tracks weapons locations and produces detailed **chain of custody** reports
- Uses radio frequency and/or bar code labels to conduct inventories and find missing weapons
- The software screens, weapons tag and electronic forms can be customized to mirror your existing workflow and weapons tracking requirements
- Offers optimal security, peak performance and low cost of ownership

BULLET-PROOF MANAGEMENT OF WEAPONS, GEAR & ACCESSORIES

**Weapons accountability and chain-of-custody,
plus bar code and radio frequency tracking**

EASILY RESPOND TO INCOMING REQUESTS TO PROVIDE:

- New weapons, gear and accessories to staff in various locales
- Weapon repairs and maintenance, including technical inspections and factory repairs
- Transfer of existing weapons from one location or owner to another
- Destruction of old weapons that are no longer serviceable
- Return of weapons to inventory when staff retire or quit

USE RFID (RADIO FREQUENCY) OR BAR CODE LABELS FOR RAPID INVENTORIES AND AUDITS

- ARMS prints weapons tags that can include RFID (radio frequency) antennas and bar code labels for rapid inventories
- Any weapon within a few feet of an RFID reader will be inventoried and associated with the location from which the inventory is taking place
- Weapons' serial numbers can be entered into a portable RFID reader and will "beep" if the reader comes within a few feet of the weapon for which the search is being conducted

CUSTOMIZED LOCATION AND STATUS MENUS MAKE CHAIN-OF-CUSTODY VERIFICATION SIMPLE

- Maintains a complete audit trail detailing a weapon's history and status from active to retired to destroyed
- Built-in weapon location screen enables individual or batch processing of weapons being received, assigned or transferred
- Automated management of weapons maintenance schedules and parts usage
- Includes standard and customized reporting to meet all requirements

*ARMS software
keeps track of weapons
locations within weapons rack systems*
